WORKSHOP

CRANIOFACIAL BASIC TECHNIQUES AND MONOBLOC ADVANCEMENT

WORKSHOP DESCRIPTIONS AND OBJECTIVES

This workshop will allow craniofacial surgeons to learn basic craniofacial procedures, and how to manage faciocranosynostoses by frontofacial monobloc advancement

Lectures

Friday:

- Basic craniofacial techniques
- Basic techniques - sagittal synostoses

Saturday + Sunday:

- Posterior distraction
- Monobloc advancement
- Monobloc in established and starting teams - international experiences

Hands on training

Training on realistic soft- and hard-tissue 3D-printed models (1 model and 1 senior supervisor for 2 participants)

Basic craniofacial procedures

- Year 2025: sagittal synostoses
- Year 2026: metopic/coronal synostoses

Advanced craniofacial procedures

- Year 2025: monobloc advancement
- Year 2026: hypertelorism

Organized by the French Reference Center for Craniosynostoses and Craniofacial Malformations (CRANIOST), in collaboration with an international expert committee
